

# Teaching Technology Tour and Q&A

## Presenters:

Katrina Johnson  
Crystal Clemons  
Alexandra Masterson  
Joe Balducci  
Jim McLean  
Julia Tungli  
LeAnn Pittman

September 24, 2020

# Before We Get Started

- Keep your Microphones Muted
- Q&A after the teaching technology tour, so please type your questions in the Chat
- Complete the one-question Survey to provide Feedback (We will provide a link)

# Topics

- How teaching technologies support these three basic teaching practices:
  - sharing information
  - checking student understanding in real time or asynchronously
  - getting students to work collaboratively
- How to incorporate teaching technologies and online learning management system tools
- How to engage students with technologies in Mason classrooms
- Where to find information and advice on teaching technologies

# Overview

# Pedagogical Overview and Online Technology Tools

Katrina Johnson

Instructional Designer, Digital Learning  
Stearns Center for Teaching and Learning

# Community of Inquiry Model

Adapted from Garrison, D.R., Anderson, T., Archer, W. (1999) Critical inquiry in a text-based environment: Computer conferencing in higher education. *The Internet and Higher Education* 2(2), 87-105

# Social Presence

Engage in supportive contact, collaboration, and interactions

Ask students to create an introduction video; submit a video assignment

Active instructor engagement; acknowledge student contributions and expertise

Encourage collaboration; exchange of ideas

Encourage collaboration; provide personalized, timely assignment feedback, such as media commenting

Establish group cohesion

Encourage collaboration; exchange of ideas

# Cognitive Presence

zoom  
Blackboard  
collaborate

Create opportunities to foster meaningful application of new knowledge

Create opportunities to connect ideas to prior learning and other course concepts; provide knowledge from diverse sources

Kaltura  
ANIMOTO

Blackboard  
learn+  
Discussions,  
Blog, Wiki, Journal  
WordPress

Discuss and introduce effective triggering events that create a sense of puzzlement

OneDrive

Promote information exchange

# Teaching Presence

Be actively involved in discussions to facilitate dialogue

Create an instructor introduction video; learning environment video tour; video announcement; mini lecture video; demonstration video; guest speakers/panel discussion; video feedback; video assignment

Blackboard learn+  
Items, Folders

Present a syllabus and schedule; module structure/organization with an intuitive navigation

Blackboard learn+  
Discussions, Achievements, Rubrics

Be actively involved in discussions to facilitate dialogue; provide digital credentials to recognize student accomplishments; engage in supportive contact and interactions; provide self-assessments and grading rubrics

Use animations and storytelling to make connections to real world situations

Use images and video to make connections to real world situations (Additional tools: Mason Creative Services, Pixabay, Picktochart)

Document sharing; signup sheets

# Tips for Success

- Begin with your learning outcomes
- Consider the technology needs of your students
- See the Stearns Center website for recommended sample statements for technology requirements and class recordings
- Practice with the technology tool and allow your students to practice

# Classroom Technology Overview

Crystal Clemons

Director, Classroom & Lab Technologies

ITS

# Classroom Technology at Mason

- Supports over 200 classrooms across four campuses
- Provides standard technologies to facilitate a standardized user experience
- Technologies offer flexibility in teaching supporting both high tech and low tech instruction

# Classroom Technology Updates

Fall 2020 return to campus activities addressed a new challenge

**COVID-19 PANDEMIC**

**Our question: How can we utilize technology to address the teaching and learning needs during the pandemic?**

# Classroom Technology Updates

Fall 2020 return to campus activities yielded changes to all classrooms:

ORIGINAL

SOCIALLY DISTANCED

# Classroom Technology Updates

Examples...

**SOCIALLY DISTANCED**

**SOCIALLY DISTANCED**

# Classroom Technology Updates

**The pandemic created** challenges for instructors in the classroom:

1. Being heard while wearing masks (*audio*)
2. Teaching hybrid and blended courses and communicating with remote virtual learners (*audio and video*)

# Classroom Technology Updates

**Pandemic challenges** led to the following modifications:

- ✓ Standard technology now supports hybrid and blended learning
- ✓ BYOD rooms updated with more technology
- ✓ Microphone installation in all rooms
- ✓ Protective coverings on all technology
- ✓ Modified hours for computer labs and support offices

**NEW**

NEW

# Classroom Technology Updates

- ✓ Standard technology supporting hybrid and blended learning includes:
  - Computer with interactive monitor (annotation capable)
  - Document camera
  - Microphones for speech amplification
  - Standard user interface
  - Webcam for audio and video conferencing with remote learners
  - Classroom capture via Zoom, Bb Collaborate Ultra, etc...

NEW

# Classroom Technology Updates

- ✓ BYOD rooms updated with more technology:
  - All BYOD rooms have been updated with **speech amplification** and the **standard computer** and includes:
    - Computer with interactive monitor (annotation capable)
    - Webcam for audio and video conferencing with remote learners
    - Access to standard Mason software
    - Ability for classroom capture via Zoom, Bb Collaborate Ultra, etc...

# Classroom Technology Updates

- ✓ Modified hours for computer labs and support offices

## **FFX Support:**

- Sunday to Saturday 7:00 to 10:30

## **Sci Tech Support:**

- Monday to Thursday 8:00 to 10:00
- Friday 8:00 to 5:00
- Saturday and Sunday Closed

## **Arlington Support:**

- Sunday Closed
- Monday to Friday 8:30 to 10:00
- Saturday 9 to 5

## **FFX JC 342 Computer Lab:**

- Monday to Thursday 9 - 9
- Friday, Saturday, Sunday 9 – 8

## **Sci Tech Computer Lab:**

- Monday to Friday 8:30 to 8:30
- Saturday and Sunday- Closed

## **Arlington Computer Lab:**

- Monday to Thursday 9:00 to 10:00
- Friday and Saturday 9:00 to 5:00
- Closed Sunday

**CITRIX**

# Citrix Virtual Lab

VCL REPLACEMENT (RETIRED  
AFTER SUMMER 2020)

IMPROVED REMOTE DELIVERY  
OF ACADEMIC SOFTWARE VIA  
THE INTERNET

THIS SEMESTER SUPPORTED  
OVER 907 UNIQUE USERS AND  
SIMULTANEOUS USERS

OVER 3,900 DIFFERENT  
LAUNCHES SINCE THE  
BEGINNING OF THE SEMESTER

# Tips for Success – Demo Rooms

- Classrooms available for faculty use during the semester. The rooms will support:
  - GENERAL USE
  - LECTURE RECORDING
  - GAINING FAMILIARITY WITH EQUIPMENT
- Rooms are as follows:
  - ✓ ENGR 1108
  - ✓ BUCH D001
  - ✓ BUCH D003
  - ✓ VM 118
  - ✓ VM 120
  - ✓ KGJ 134

## Tips for Success – Tech Assistance

**(703) 993-3456** or **x3456** (FFX)

**(703) 993-8499** or **x8499** (Sci Tech)

**(703) 993-8226** or **x8226** (Arl) for

1. Remote tech support for
2. In-person training
3. Remote/Zoom training

# Advice In Starting Your Online Lab

- Design your lab with the course objectives in mind. You can always modify as your lab progress.
- Invest in an inexpensive document camera. Can use with Blackboard Collaborate and Zoom.
- Safety at home—still follow lab safety guidelines.
- Science kits or not? Liability?
- Make lab instructions simple and clear as possible.
- Be available online if you are asynchronous. Prefer synchronous, especially for freshmen & sophomores, with lots of live demonstrations online.
- Online demonstrations are a good way of demonstrating lab techniques to inexperienced students.

# Learning Space Design

- Design and engineering of classroom technologies
- Manage classroom design and installation projects

# 1st Active Learning Classroom

## Successes:

- Maximized writable surfaces on wall
- Displays around the room
- Faculty tech workshops kept in-class training to a minimum

## Challenges:

- Cost; Unscalable model/unsustainable
- Complexity of user interface
- Various facilities issues
- Technology support issues

# The Iterative Process

## MASON'S ITERATIVE DESIGN PROCESS

GEORGE MASON UNIVERSITY

## Implementation of the Process for Peterson Hall:

- **PLAN:** We worked with Facilities Planning and faculty to gather requirements
  - Continuous meetings with Stearns Center/Center for Teaching and Faculty Excellence and Learning Environments Group
  - Participated in focus group/workshop with Facilities Planning, faculty, and architects
- **DESIGN/BUILD:** We designed classrooms & group study rooms
- **ASSESS:** We held open houses for faculty & obtained feedback
- **REFINE:** Applied feedback to upcoming projects and/or technology standards
- **PLAN:** Used feedback from Innovation Hall 3rd floor project to inform Peterson Hall

# Examples of the iterative process

- Low cost solutions for active learning
- A more flexible classroom with computer stations

**Peterson**

# Annual Refresh

- Classroom technology has a 6yr lifecycle
- Approx 40 classrooms are refreshed across all campuses each year
- Recent changes to the standard technology package includes:
  - Wireless presentation to provide both faculty and students ability to share content wirelessly
  - Web conferencing functionality for faculty to engage remote students and host guest speakers
  - Enhanced presentation capabilities in active learning classrooms

[Service Summary](#) | [Key Features](#) | [Getting This Service](#) | [Availability](#) | [Policy](#)

## Service Summary

Learning Space Design (LSD) supports the design, engineering, and implementation of classroom technologies to support teaching and learning on all Mason campuses. LSD is responsible for coordinating and/or implementing classroom design projects to include new construction, renovations, and technology refreshes. Learning spaces include non-traditional environments, specialized labs, customized classrooms, and miscellaneous spaces that are not readily classified

## Learning Space Design Assessment

### Available to:

Faculty & Staff

### Fee:

There is no charge for this service.

### Getting Help:

# Resources

- Classroom Specific Information - Stearn's Center Classroom Guide
- ITS Services – <https://its.gmu.edu/service/learning-space-design/>

# Classroom Support

- Maintenance and support of classroom technologies, computer classrooms, and computer labs
- Provides Service Level Agreements (SLA) for maintenance and support on department owned classroom technologies.

# Methods of Support

HELP DESK- MANAGES THE CLASSROOM SUPPORT HELP DESK TO PROVIDE TECHNICAL SUPPORT AS NEEDED

TECHNICAL ASSISTANCE - PROVIDES REMOTE AND IN-PERSON ASSISTANCE TO REMEDIATE CLASSROOM TECHNOLOGY ISSUES

TRAINING- PROVIDES REMOTE AND IN-PERSON TRAINING

# Computing Services

- Manage over 800 computers in Mason classrooms and labs across all four campuses
- Test, implement, support and maintain the Citrix Virtual computing labs
- Provide technical support for hardware and software on supported workstations

# Software Services

**Software Images:** Computing Services develops, maintains, and installs the software image for all Mason computers.

**Software Request:** Computing Services conducts software evaluation, testing and license compliance for all software installed on all Computing Services imaged workstations

# Key Takeaways

## Design Consultations:

LSD offers design consultations for various learning spaces across all campuses.

## Technology Refresh:

LSD ensures learning spaces are updated to improve the teaching and learning experience.

## Training:

Classroom support offers training to inform instructors about available technology

## Technical Support:

Classroom support provides timely remote support to help prevent classroom downtime.

## Remote Software Delivery:

Computing Services tests, implements, and supports the virtual computing labs

## Software:

Computing Services develops, maintains, and installs the software image for Mason computers.

## Breakout Session

B

Zoom and Blackboard Collaborate Ultra:  
Key Differences, Use Cases, and More (20 mins)  
Julia Tungli - ITS

# Zoom and Blackboard Collaborate Ultra: Key Differences, Use Cases, and More

Julia Tungli

Instructional Technologist

Learning Support Services, ITS

# Differences

- Breakout Rooms
- File Sharing
- Integration with Blackboard
- Personal Meeting Room
- Polling
- Video Tiles
- Waiting Room
- Whiteboard

# Use Cases

- How do you use web conferencing?
- How do you want to use web conferencing?

# Tips for Success

- Do what you find comfortable.
- Try out any new tool or feature before you use it.
- Allow time for technical difficulties.
- Have a backup plan.
- Invite feedback for improvements.

# Resources
